Own Your Website

$7,500
Fixed price
White glove, start to finish

Your WordPress or Wix site moved to a fast, plain HTML site that you own: hosted on Cloudflare, every file in your own GitHub, and edited by talking to Claude. We do the work, start to finish. No instructions handed over.

HOW IT WORKS

01
Book a call
A 20-minute conversation so we both know it's a fit. No commitment.

02
Audit and prep
We audit your site and agree on scope. You do a few setup steps, and we guide you through them.

03
Working sessions
We do the build in your own accounts, with you alongside. You practice in between.

04
Training
We work through real changes together until you can make them yourself with Claude.

05
30 days of support
Unlimited email and chat from the day you sign. After that, hourly or a monthly retainer, if you want it.

WHAT'S INCLUDED

- An audit of your site: gaps found, scope agreed
- A before benchmark: search, AI answers and site speed
- Research on how companies in your space get found
- The conversion itself, done by us, in your accounts
- The DNS cutover, handled by us
- Working sessions, then training on Claude's findings
- 30 days of unlimited email and chat support

WHAT CHANGES FOR YOU

- **Ownership.** The files are yours, not a platform's
- **Cost.** No page-builder, plugin or hosting fees
- **Changes.** Describe it to Claude and it's done
- **Found by AI.** A clear, fast site machines can read
- **Nimble.** Small changes in minutes, not weeks

THE ASK-AI TEST

Ask ChatGPT or Claude who the best company in your space is. Are you in the answer?

It takes two minutes. We run it before we start and again after, so you can see the difference.

THE IMPROVEMENT LOOP

Claude recommends improvements for search, AI answers and content. What we learn becomes new pages and social posts. You measure, then repeat.

HONEST LIMITS

A business site with pages, images and a contact form converts cleanly. Stores, member logins and complex booking take more thought, which is why the audit comes first and scope is agreed before any work starts.
