Summit

$15,000+

90 days · follows Ascent

The last stage. The whole organization works in the new system, and I hand leadership to your team. You finish with one system of record that you own, for your data and your applications.

WHERE SUMMIT FITS

MONTHS 1-3	MONTHS 4-6	MONTHS 7-9
Base Camp	**Ascent**	**Summit**
Discovery, training and a roadmap your team can follow.	The build: moving your work onto systems you own.	The whole company on the new system, led by your team.

WHAT HAPPENS AT THE SUMMIT

Roll out

- The whole organization on the new system

Finish the move

- Migration off rented software completed

Hand off

- Leadership handed to your team, with a plan for year two

SOVEREIGNTY: OWN THE SYSTEM YOUR BUSINESS RUNS ON

01

Own your data

Your data stays in systems you control, never handed to a public AI model.

02

Own your software

Open, portable code that is yours, not tied to any one AI vendor.

03

Own your IP

What your people know, captured where your team and your AI can search it.

The goal: cut your software and IT spend by up to 80%, measured against the starting spend we agree on.

After the Summit: run it yourselves, or keep me on as your Fractional Chief AI Officer, $5,000–$10,000 a month depending on scope.
